

Kelly Clymer, MPT

Kelly was born and raised in Michigan, and received her B.A. in psychology from Kent State University in Ohio, while competing in Division one track and field. She graduated from Old Dominion University in 2000 with a Master's of Physical Therapy Degree.

She has worked exclusively in outpatient orthopedics, but has seen much of the country; also working in Florida, Texas, Virginia and Georgia. She recently relocated to Marin with her husband and three children.

Kelly enjoys the diversity that comes with her work, and believes in giving patients the tools to empower themselves during treatment as well as prevention for the future. When not at work she can be found spending time with her family, cooking, and exploring all that the Bay Area has to offer.
